Portable Classic Waterproof Protective Case

MEIJIA is a prestiged portable classic waterproof protective case manufacturer in China. With advanced production equipments and management & technical team, our company has passed ISO9001, GS quality system certification. Having years of experience in case production and export, we sold our portable waterproof protective cases all over the world. We are hoping to become your long-term partner in China.

MEIJIA, a large and professional portable classic waterproof protective case factory, have been specializing in providing high quality cases and the best services for customers for many years. Quality portable classic waterproof protective case provide a safety guarantee for the users to carry their valued possessions and precision instruments conveniently and safely. The case is made by high quality modified PP engineering plastics, makes the case substantial and improve the performances of flame retardancy, strength, impact resistance, toughness. The cubic foam inside supports arbitrary cutting and can meet different needs of customers. The portable classic waterproof protective case is also waterproof, as its name shows. The performance of waterproof makes MEIJIA portable classic waterproof protective case works well even in bad weather all year round. Those features meet people's requests all over the world. MEIJIA can also produce cases according to your design and sample proofing.

MEIJIA professional portable classic waterproof protective case Introduction
Model: MJ-139-20.5'

In recent years, waterproof protective cases have been widely used, not only in daily life, but also in military and police, photography, medical and other fields.

China MEIJIA professional portable classic waterproof protective case

The materials of waterproof protective cases in China, at present, are mainly ABS plastics and modified PP engineering plastics. However, lacking sufficient elasticity, being brittle and relatively hard on the senses, the protective performance of ABS plastic is inferior to PP engineering plastics. PP engineering plastics improve the properties of flame retardancy, strength, impact resistance, toughness, etc., and are superior materials for the production of safety cases. Of course, the cost of PP material will be relatively high. Being dedicated in producing high quality waterproof cases, MEIJIA chooses modified PP engineering plastics as materials of professional portable classic waterproof protective cases. The cases can provide ultimate protection for your valued things.

MEIJIA professional portable classic waterproof protective case Details

Sturdy packaging provides solid protection for the contents. MEIJIA professional portable classic waterproof protective case provides not only solid and full sides protection, but also smooth user experience from an ergonomic point of view.

R angle

The edge of the box mouth is designed with an inverted R angle, which is beautiful and smooth, so that you will not be injured by the angle.

Customizable Fit Foam Insert

Foams are extremely well padded inside the cases, with the ability to be cut according to your needs; by making it fit to a particular object/item keeps them snugly in place during transport, foams keep the objects from the shocks and bumps on the road.

Easy To Open With Latches Design

Smarter and easier to open than traditional cases. Start the release and offers plenty of leverage to open with a light pull in just seconds.

High Quality Auto Exhaust Valve

Solve the problem that the box can not be opened or deformation due to the difference of internal and external air pressure and keep water molecules out.

Portable Handle Design

Easy to go with our portable handle design. Beautiful and Functional Injection Molded. Durable use with the solid construction.
